

**Sloop2desc**

Sharing learning objects in an open perspective  
to develop European skills and competences

**Sloop2desc**

**Final meeting**

***Milan, 26 September 2011***

# **The role of enterprises**

***Annalisa Lorito***

## *Our contribution in the projects activities:*

---

- to bring the educational institutions – Research Centres – Research And Development Agencies closer to companies;
- to identify companies needs and expectations towards the *new professional human resources*
- To define new educational strategies on the basis of companies need and teachers skills and expertises

# ***WP2 – Build conditions for the transfer of innovations***

---

- General aim: to foster the creation of conditions to fulfil the transfer of the Sloop project.
- Objective: to amplify the impact on the school, the business world, and more generally on stakeholders and policy makers
  - How (activities): to promote a community of practice that, from a regional level, is able to involve teachers, businesses and other stakeholders (in the selected competencies sector) at both national and transnational levels

# ***WP2 – Build conditions for the transfer of innovations***

---

## Results:

Community of practice: an important outcome of the project was the establishment of a community of practice which involved teachers, SMEs' representatives and stakeholders

The purpose of the community of practice has been to promote the dissemination of the project and allowed for continuous interaction among partners and potential users of the project results during the entire life cycle of the project

# *The SME's tutors roles*

---

The SME's tutors role in the project was to bring the ICT enterprises perspective, approaches and methodologies to the Sloop2Desc courses

## Main focuses:

supporting the courses participants in defining the objectives for each module;

Contributing to the forum discussions on ICT related subjects and on general themes such as school-enterprise relationship and how current teaching approaches can meet ICT enterprises needs in resources education and vocational training

Contributing to the project in supporting the project coordinators with approach and methodology definition for defining the role, objectives and actions for the enterprise tutors

# *How we worked*

---

- The tutors studied the project in order to better understand what the project wanted from the SME's support
- Each tutor has been assigned to a classroom in order to better share opinions and comments with the students
- We defined some fields where interests converged (interests from the SMES and from the schools);
- Each tutor evaluated the products the classroom students developed;
- Each tutor interacted with the assigned virtual classroom

# *What we have done*

---

- Animating the forum: The community of practise;
- Providing teachers with a better understanding of the needs and expectations in an ICT enterprise;
- Producing real ideas on how to involve enterprises in the high school educational paths;
- highlighting and transferring best practices on successful experiences;

**Indice degli argomenti****INTRODUZIONE**The course is designed around the needs of those who approach for the first time in GNU / Linux. In addition we will pay particular attention to those who must use that system at school.  
The course is not intended to be comprehensive in all the arguments that we will, but rather meant to be a guide for the first approach, showing the means to use a Linux system.**OBIETTIVI**

- Fornire le informazioni per installare, configurare un sistema Linux.
- Dare una minima preparazione sul sistema Linux base.
- Mettere in grado i partecipanti di affrontare le necessità di basi del sistema operativo.
- Affrontare problematiche reali, confrontare Linux con altri sistemi operativi

# *What we have seen*

---

- *Enthusiastic approaches;*
- *High quality products*
- *Exchange of opinions and ideas;*
- *Building of ideas and new deal*
- *Know-how transfer;*
- *Knowledge and approaches exchange*

# *Learned lessons*

---

*To have brought the companies within the schools*

*To have introduced the schools in the SMES*

*To have moved interest towards the business field*

*To have stimulated the clash of two worlds: business and school field;*

*To have setup a forum of discussions and a sharing of different points of view*

# *Moving to the Sloop3desc*

---

- *To Improve the information flow*
- *To better define themes and involvement of both parties*
- *To better indentify skills and competences;*

---
